

THE 7-DAY FIRST CLIENT SYSTEM

For builders who can make websites but need a simple path to paid projects

Promise: Pick one simple website offer, send focused outreach, book conversations, and close your first paid project.

Who This Is For

- You can build basic websites or landing pages, but you have not monetized the skill yet.
- You do not have a strong portfolio and need a shortcut to proof.
- You want a simple daily plan instead of another long course.

The Core Rule

Do not build another app before making offers. Paid projects come from clear offers, targeted businesses, conversations, and follow-up.

Part 1 - Pick One Offer

Offer	Positioning	Starter Price	Best For
Starter Website	Simple, modern 1-page website that helps customers understand and contact the business fast.	\$500-\$900	Businesses with no website
Website Redesign	Clean up an outdated site so it looks more trustworthy and turns visitors into leads.	\$800-\$1,500	Businesses with old, confusing, or weak mobile sites
Website Care Plan	Monthly updates, small edits, and basic improvements so the owner does not touch the site.	\$150-\$350/mo	Recurring income after a project

Recommended first offer: Website Redesign. It is easier to prove because you can show old vs. improved.

Part 2 - Build the Target List

- Search Google Maps and Instagram for local businesses.
- Start with barbershops, restaurants, contractors, HVAC, plumbing, cleaning, landscaping, med spas, and real estate agents.

- Add a lead when the site is missing, outdated, slow, confusing, or weak on mobile.

Part 3 - No-Portfolio Demo Hack

1. Pick one business from the lead list.
2. Rebuild only the top section of their homepage: headline, hero image area, services, contact button.
3. Screenshot your version.
4. Use it as proof with the line: “I put together a quick visual idea for how your site could look cleaner and make it easier for customers to contact you.”

Part 4 - Outreach Scripts

Instagram DM 1

Hey — quick question. I came across your business and noticed your website could be doing a better job turning visitors into calls. I build simple, modern websites for local businesses. Would you be open to a quick idea I had for yours?

Instagram DM 2

Hey, I checked out your site and noticed a few easy fixes that could make it look more trustworthy on mobile. I can send a quick redesign idea if you want.

Cold Email

Subject: Quick website idea

Hey, I came across your business and had a quick idea for your website. I build simple website redesigns for local businesses that want more calls and leads. I noticed a few things that could be improved quickly. Want me to send the idea over?

Follow Up 1

Just following up on this. I can send a quick visual idea, no pressure.

Follow Up 2

Totally understand if now is not the right time. If you ever want a cleaner site that makes it easier for customers to contact you, I can help.

Part 5 - Discovery Call Script

- Opening: Thanks for taking a few minutes. I want to understand what you need and see if I can actually help.
- Question 1: What do customers usually come to you for?
- Question 2: Where do most leads come from right now?
- Question 3: What do you dislike about the current website?
- Question 4: What action should visitors take?
- Close: Based on what you said, I recommend a simple redesign focused on mobile trust, clear services, and a stronger contact flow.

Part 6 - 7-Day Action Plan

Day	Action
1	Pick the Website Redesign offer and build one demo.
2	Build a list of 50 local businesses.
3	Send 20 messages.
4	Send 20 more and follow up with Day 3 leads.
5	Send 20 more and book calls.
6	Send proposals to interested leads.
7	Close one project or continue the loop until one closes.

Daily Scorecard

- Messages sent: ____
- Replies: ____
- Calls booked: ____
- Proposals sent: ____
- Closed projects: ____

Final Rules

- Do not redesign this system before using it.
- Do not wait for perfect branding.
- Send 100 messages before deciding what does or does not work.
- A paid project is better than a perfect portfolio.
