

EMAIL SEQUENCE + BUYER FOLLOW-UP

Delivery and nurture emails for buyers and leads

Buyer Delivery Email

Subject: Your 7-Day First Client System is here

Body: Thanks for grabbing the toolkit. Start with Day 1 today: pick one offer and build one demo. Do not read this like a book. Use it like a checklist. Your first goal is 20 messages sent.

Email 2 - Day 2

Subject: The mistake that keeps builders broke

Body: Most people keep improving their skills but avoid making offers. Today, build your lead list and send your first batch. Momentum matters more than confidence.

Email 3 - Day 4

Subject: What to do when they reply

Body: When someone replies, do not over-explain. Ask what they dislike about their site, what action they want visitors to take, and whether they want a quick recommendation.

Email 4 - Day 6

Subject: A simple close that does not feel pushy

Body: Based on what they said, recommend one package. Keep it simple: goal, scope, timeline, price, next step. If you need help with this, the Client Closing Kit has the call script and proposal template.

Email 5 - Day 8

Subject: Keep the loop going

Body: If you did not close yet, do not restart. Continue the same loop: 20 messages, follow-ups, quick demos, simple calls. Most people quit right before the replies stack up.

Abandoned Cart Email

Subject: Still trying to get your first website project?

Body: The system is simple: pick the offer, send the scripts, track the replies, follow up. If you are tired of guessing, the toolkit is ready when you are.

Testimonial Request

Subject: Quick favor?

Body: Did the toolkit help you send messages, get replies, or close a project? Reply with one sentence I can use as feedback. A screenshot is even better.
